**OKLAHOMA HAY MARKET REPORT**

**3-6-20**

**3-5-20**

Alfalfa and hay trade movement continues very slow and much of the hay trade remains steady. Most of the Alfalfa quoted at the top of the price ranges, had to be flawless. Milk prices declined in the past week, after making some good advances. These declines are reducing the demand for Alfalfa hay. Producers are about a month and a half away from new crop hay and hoping markets will have come back to some sort of normalcy. According to the U.S Drought Monitor and the Oklahoma Mesonet, much of the state is in good shape as far as moisture. Only the far western tip of the panhandle and the southwest portion of the state show abnormally dry to moderate drought with only a small section in severe drought.

**OKLAHOMA HAY MARKET REPORT**

**3-13-20**

**3-12-20**

Alfalfa and hay trade movement was at a standstill this week, trade remains steady. Most of the Alfalfa quoted at the top of the price ranges, had to be flawless. Milk prices declined again this week. These declines are reducing the demand for Alfalfa hay. Producers are about a two months away from new crop hay and hoping markets will have come back to some sort of normalcy. Warmer weather especially overnight is needed for this to happen.

Receipts: 1,784 Last Week 4,252 Last Year 6,219

**OKLAHOMA HAY MARKET REPORT  
3-19-20**

Alfalfa and hay trade movement was at a standstill again this week, trade remains steady. Most of the Alfalfa quoted at the top of the price ranges, had to be flawless. Heavy rainfall across the trade area has hampered hay trade and movement. Producers are about a month and a half way from new crop hay and hoping markets will have come back to some sort of normalcy. Warmer weather especially overnight is needed for this to happen.

**OKLAHOMA HAY MARKET REPORT  
3-26-20**

Alfalfa and hay trade movement was at a standstill again this week, trade remains steady. Most of the Alfalfa quoted at the top of the price ranges, had to be flawless. Heavy rainfall fell across the trade area last week and has hampered hay trade and movement. Producers are about a month way from new crop hay and hoping markets will have come back to some sort of normalcy. Warmer weather is expected this week.

**OKLAHOMA HAY MARKET REPORT

Alfalfa and hay trade movement is slow but beginning to move. Few early prices are reportedly lower but producers are reporting that finding a true value is difficult. With warmer weather, Bermuda grass is just starting to show and producers expecting a first cutting of that hay come June. Some areas of the state are reportedly dry once again but rains storms expect to move thru over night.

**OKLAHOMA HAY MARKET REPORT  
5-14-20**

Alfalfa and hay trade movement is slow but beginning to move. Few early prices are reportedly lower but producers are reporting that finding a true value is difficult. Most everyone has their first cutting of Alfalfa done or in the heart of it. Dairy hay is extremely slow as cutbacks are taking place in that industry as well. With warmer weather, Bermuda grass is just starting to show and producers expecting a first cutting of that hay come June. Some areas of the state are reportedly dry once again but rains storms expect to move thru over night.

**OKLAHOMA HAY MARKET REPORT  
5-28-20**

Alfalfa and hay trade movement not tested this week. Rainfall has swept across the trade area keeping producers out of the field this week. Producers are reporting that finding a true value is difficult. Most everyone has their first cutting of Alfalfa done. Dairy hay is extremely slow as cutbacks are taking place in that industry as well. With warmer weather, Bermuda grass is ready for first cutting as soon as conditions are ready.

**Oklahoma Direct Feeder Cattle Trade**

**OKLAHOMA HAY MARKET REPORT  
6-18-20**

**6-19-20**

Alfalfa and hay trade movement has increased over the week, mostly cow hay and small squares. Wheat hay across the state is and or has been harvested. However as of now no true price has been established. More summertime temperatures and no rain is in the forecast and many producers are expecting prices to get higher if rain doesn't come soon. Producers are reporting that finding a true value is difficult for new crop as many continue to clean out their barns from last season and those prices continue to fall. Small square bales of grass hay continues to move at a rapid pace.

**OKLAHOMA HAY MARKET REPORT  
6-25-20**

Alfalfa and hay trade movement has slowed down quite a bit over the week, mostly cow hay and small squares are moving still. Wheat hay across the state is and or has been harvested. However as of now no true price has been established. Cooler than average summer like temperatures and several inches of rain has fell across the trade area over the week. Producers are reporting that finding a true value is difficult for new crop as many continue to clean out their barns from last season and those prices continue to fall. Small square bales of grass hay continues to move at a rapid pace.

**OKLAHOMA HAY MARKET REPORT  
8-6-20**

**8-7-20**

\*\*\* Please note that from this forward this report will be released bi-weekly until hay trade starts to be more active. Next report will be released on 08-20-20 \*\*\*. Compared to two weeks ago: All classes of hay trade has been extremely slow due to recent heavy rains and cooler temperatures having producers hoping for a second cutting of Bermuda grass. Alfalfa trade also has been slow and getting cheaper as many dairies are looking for alternative feed stuffs. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Demand mostly light to moderate.

Receipts: 4,259 Last Week 3,059 Last Year 5,584  
Compared to last week: Feeder steers lightly tested few trades 2.00 higher. Feeder heifers were not tested on a Current FOB Basis and no trend was available. Demand good. Supply consisted of 91 percent over 600 lbs and 81 percent heifers. Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 8-12 cent slide on calves and 4-8 cent slide on yearlings from base weights.

Compared to two weeks ago: All classes of hay trade continues to be slow due to recent heavy rains and cooler temperatures having producers hoping and preparing for a second cutting of Bermuda grass. Temperatures are unseasonably cool, forecast has the next week in mostly upper 80's. Demand mostly light to moderate.

**OKLAHOMA HAY MARKET REPORT  
9-3-20**

Compared to two weeks ago: All classes of hay trade continues to be extremely slow due to recent heavy rains and cooler than average temperatures having producers hoping and preparing for a second cutting of Bermuda grass later this Fall. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Temperatures are unseasonably cool, forecast has the next week in mostly upper 70's and many nights in the 40's. Demand mostly light. Please note that until hay trade becomes more active this report will become bi-weekly

**OKLAHOMA HAY MARKET REPORT  
9-3-20**

**9-11-20**

Compared to two weeks ago: All classes of hay trade continues to be extremely slow due to recent heavy rains and cooler than average temperatures having producers hoping and preparing for a second cutting of Bermuda grass later this Fall. Alfalfa trade also has been extremely slow and getting cheaper as many dairies continue to look for alternative feed stuffs. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Temperatures are unseasonably cool, forecast has the next week in mostly upper 70's and many nights in the 40's. Demand mostly light. Please note that until hay trade becomes more active this report will become bi-weekly the next report will be September 17th.

Receipts: 989 Last Week 3,835 Last Year 1,322  
Compared to last week: Feeder steers and heifers lightly tested this week. Demand moderate. Unseasonably cooler temperatures and several days of rain have swept across the trade area. Supply consisted of 100 percent over 600 lbs and 0 percent heifers. Unless otherwise stated prices are FOB weigh point with a 2-3 percent shrink or equivalent and with a 8-12 Cent slide on calves and 4-8 cent slide on yearlings from base weights.

**OKLAHOMA HAY MARKET REPORT  
9-17-20**

Compared to two week's ago: Hay trade remains slow on limited offerings due to recent heavy rains and cooler than average temperatures has producers preparing for a second cutting of Bermuda grass later this Fall. Alfalfa trade also has been slow because many dairies have introduced alternative feed stuffs. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Temperatures are unseasonably cool by about 5 to 7 degrees under seasonal averages, forecast has the next week in mostly low to mid 80's and many nights in the 40's. Demand mostly light. Please note that until hay trade becomes more active this report will become bi-weekly, the next report will be Oct. 1st.

**OKLAHOMA HAY MARKET REPORT  
10-1-20**

**10-2-20**

Compared to two week's ago: Hay trade remains inactive as many producers are in the field planting wheat. Cooler than average temperatures have swept across the trade area. Many producers are looking for alternative feed stuffs. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Temperatures are unseasonably cool by about 5 to 7 degrees under seasonal averages, forecast has the next week in mostly low to mid 80's and many nights in the 40's. Demand mostly light. The next report will be Oct. 15th.

Receipts: 1,265 Last Week 989 Last Year 1,768  
Compared to last week: Feeder steers and heifers were lightly tested on a Current FOB Basis but a lower undertone is noted. Demand moderate. Many producers are in the field planting wheat.

**Oklahoma Direct Feeder Cattle Trade**

**OKLAHOMA HAY MARKET REPORT  
10-1-20**

**10-9-20**

Compared to two week's ago: Hay trade remains inactive as many producers are in the field planting wheat. Cooler than average temperatures have swept across the trade area. Many producers are looking for alternative feed stuffs. Stock cow producers are hoping the cooler and wetter weather will extend grazing into the Fall leaving less need to start stock piling hay. Temperatures are unseasonably cool by about 5 to 7 degrees under seasonal averages, forecast has the next week in mostly low to mid 80's and many nights in the 40's. Demand mostly light. The next report will be Oct. 15th.

**Oklahoma Direct Feeder Cattle Trade**

**OKLAHOMA HAY MARKET REPORT  
10-15-20**

Compared to two week's ago: Hay trade remains slow as many producers are finishing up planting wheat and are taking inventory on what they should need for the winter. Warmer than average temperatures have been the norm as of late but a cool front is expected to sweep across the trade area. Many producers continue to look for alternative feed stuffs. Stock cow producers are hoping for a much needed rain to help extend grazing into the Fall leaving less need to start stock piling hay. Demand mostly light. The next report will be Oct. 29th.

**OKLAHOMA HAY MARKET REPORT  
10-15-20**

Compared to two week's ago: Hay trade remains slow as many producers are finishing up planting wheat and are taking inventory on what they should need for the winter. Warmer than average temperatures have been the norm as of late but a cool front is expected to sweep across the trade area. Many producers continue to look for alternative feed stuffs. Stock cow producers are hoping for a much needed rain to help extend grazing into the Fall leaving less need to start stock piling hay. Demand mostly light. The next report will be Oct. 29th.
