

Farmer's Market Price Report OSU-OKC

August

2021

Market Comments:

Still a plethora of vegetables at the Farmers market this late in August. However the late heat along with Army Worms and Grass Hoppers are definitely taking a toll on crops. Some vegetables were making their final appearance such as carrots and grillings. Summer's heat baking the earth has created difficult growing conditions. The heat didn't keep shoppers away at the market though as many folks were out and about filling their bags with goodies. The Farmers Market will continue thru October. So 2 months left.

Classification and Varieties	Production Practice	Unit of Sale	Lowest Price	Highest Price
