

Oklahoma

Sorghum

Who We Are

The purpose of the Oklahoma Sorghum Commission is to develop, carry out and participate in programs of research in grain sorghum production, disease and insect control.

Development

The Commission is also dedicated to development and participation in programs of education and promotion designed to encourage the production, marketing and use of the commodity.

The Smart Choice

Sorghum has tremendous potential to return a profit to your farm, and the work of the Sorghum Checkoff will only improve that potential over time. As you manage your sorghum, keep these tips in mind:

- Make sure you are using the hybrid that works in your area and planting to get the right plants per acre in your field.
- Use an integrated weed management strategy.
- Most importantly, provide the crop with adequate fertilizer.
