Oklahoma Production Cost Report (Bi-Weekly)

5-2-25

Compared to last report: Urea and UAN continue significant price increases again. Supply allocation of UAN continues in Western Oklahoma and there is talk Urea allocation maybe next. In Eastern Oklahoma some contacts were told no UAN supply until July. Eastern Oklahoma has received up to 19 inches of rain for the month of April, this is causing supply issues at the port. Farmers who have already gotten their corn planted now see fields under water. At the beginning of April lack of moisture was the main concern and now too much moisture is the concern. Rain is forecasted again for next week. Farm Diesel and Propane decreased slightly in price.

Oklahoma Retail Feed Cost Report (Monthly)

5-5-25

Compared to last report: Feed prices were variable as feed stores lock in summer months pricing. USDA forecasts 94.0 million acres of corn will be planted in the US, that is up 3.4 million acres from a year ago. Feed prices will adjust based on yields harvested this fall. Many farmers in Oklahoma have already planted corn only to see fields flooded this week. April 2025 is the wettest April in Oklahoma City history with 12.5 inches of rain. Eastern Oklahoma has received as much as 19 inches of rain for April. Feed demand has decreased as the grass is growing with the vast amounts of rain received. Sale barns are at historically high prices. Cattle futures continue to remain strong.
